Target Audience: Orthopedic Surgeons, Rheumatologists, Psychiatrists & Sports Medicine Physicians

Practice gap/Needs Assessment: 5-10% of young patients with knee injuries and hemarthrosis have a focal, chondral injury. The incidence of severe articular cartilage injury in acute ACL tears is between 16% and 46%.

Educational Objectives:

As a result of this activity the participants will be able to:

- 1) To understand the causes and work-up of injury to articular cartilage of the knee.
- 2) To understand the decision-making process and treatment options for articular cartilage injury in the knee.
- 3) To report the results and success rates of various procedures for cartilage repair and regeneration.

Accreditation Statement: This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education through the joint sponsorship of Rosalind Franklin University of Medicine & Science and Mount Sinai Hospital Medical Center. Rosalind Franklin University of Medicine & Science is accredited by the ACCME to provide continuing medical education for physicians.

Designation Statement: Rosalind Franklin University of Medicine & Science designates this live educational activity for a maximum of 1.0 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Faculty Disclosure: Dr. Hany El Rashidy acknowledges that he has been a consultant of the following commercial organizations: Consultant of Arthrex.

Planner Disclosure: Dr. Jeffrey Rosengarten has no financial relationship with any industry companies relating to the topic of this activity.
